Ideation Phase
Define the Problem Statements

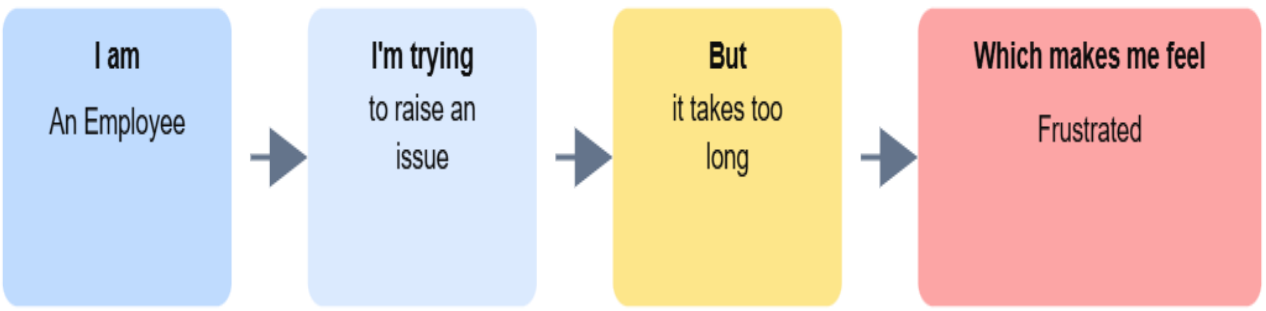

Date	11 September 2026
Project Name	Employee Raise Issue
Maximum Marks	2 Marks

Customer Problem Statement Template:

The Employee Raise Issue application is designed to help employees report workplace concerns, IT issues, and service requests through a simple and structured process. The goal is to provide a centralized platform where requests can be submitted, tracked, and resolved efficiently, improving communication between employees and the support team

I am	An employee who needs workplace support
I'm trying to	Report a technical issue or service request
But	The reporting process is slow or confusing
Because	I need quick assistance and clear communication
Which	Frustrated and stressed while waiting for issue resolution

Example:

Problem Statement Table – Employee Raise Issue

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Employee	Raise a workplace issue	The issue-reporting process is confusing and time-consuming	There is no centralized system to submit and track employee issues	Frustrated
PS-2	Employee	Submit all required issue details	I may not know which information is necessary	There is no structured form guiding me through the reporting process	Confused
PS-3	Employee	Select the correct issue category and subcategory	I may see irrelevant options	Issues are not properly classified using dependent choices	Confused
PS-4	Employee	Get my issue resolved quickly	The response and status may not be clear	Issue information is not centrally managed and tracked	Stressed
PS-5	Support/Admin	Receive complete issue information	Important details may be missing	Employees may submit incomplete or inconsistent information	Concerned
PS-6	Administrator	Manage and monitor employee issues	Handling issues manually is difficult	A centralized ServiceNow table is needed to store and manage records	Overwhelmed
