Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	12 September 2026
Project Name	Employee Raise Issue
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Employee Form, Login using Company Email, User Profile Creation
FR-2	User Authentication	Email Verification, OTP Verification, Secure Login
FR-3	Raise Employee Issue	Select Category & Subcategory, Enter Issue Details, Attach Supporting Files
FR-4	Issue Management	Generate Ticket Number, Save Issue Record, Track Issue Status
FR-5	Assignment & Resolution	Auto-assign to Support Team, Update Resolution Notes, Close Issue
FR-6	Notifications	Email Notification on Ticket Creation, Status Update Alerts, Issue Closure Notification
FR-7	Reports & Dashboard	View My Issues, Filter by Status, Generate Issue Reports

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	The application should provide a simple, user-friendly interface so employees can raise and track issues with minimal training.
NFR-2	**Security**	Only authorized users can access the system. Role-based access control (ACLs), secure login, and data protection must be enforced.
NFR-3	**Reliability**	The system should accurately save issue records, prevent data loss, and ensure consistent operation with proper error handling.
NFR-4	**Performance**	Issue forms, searches, and dashboards should load quickly, and ticket creation should be completed within a few seconds under normal usage.
NFR-5	**Availability**	The application should be available 24×7, allowing employees to report issues anytime with minimal downtime.
NFR-6	**Scalability**	The system should support an increasing number of employees, tickets, and departments without significant performance degradation.
